DETAILED ACTION***Election/Restriction***

Applicant's election, without traverse, of Group I and compound 22 as the Group and species, respectively, elected to begin prosecution is acknowledged. New claims 13-16, being compound claims, will also be considered as Group I claims. The election/restriction is hereby made FINAL.

The Office reminds applicant that when the examiner has required restriction between product and process claims and where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Claim Objections

Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The substituent definitions for R⁴ and R⁵ of formula (1) of claim 1 (the independent claim) do not encompass the R⁴ and -CHCH-R⁶ substituent definitions of formula (2) of claim 2. These definitions in claim 2 are actually broader than those of claim 1.

Allowable Subject Matter

The elected species has been searched and is deemed free of the prior art. The search was therefore expanded as called for under current Office Markush practice, a compound-by-compound search, to include a single additional species. That species is defined when, using formula (1): R¹=H; R²=R³=R⁴=alkyl=CH₃ and R⁵=alkyl=Pr-n. A rejection follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1621

Claims 1, 2 and 13-16, in so far as they read on the species defined above, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by *Journal of the American Chemical Society* (1932), 54, p. 4385-91 (CAPLUS abstract). The reference teaches applicant's compound: RN=857780-27-9.
